

Alien Planet!

First explain how you landed on the planet. Here are some ideas to help you.

(My engine blew up or I ran out of fuel or I wanted to investigate the planet or I thought it was a different planet.)

Describe what you saw when you stepped out onto the planet surface.

Talk about:

The sky - what colour is it? Is there any gas?

The landscape - describe the texture.

Rocks

Stones

Are there any plants?

Is there any water?

How far can you see?

Are there hills or is it flat?

Does anything make you think there are creatures here?

Can you breathe?

Do you need a space suit?

Are you floating? Is there enough gravity to keep you on the ground?

Can you hear or smell anything?

What sort of temperature is it?

Are you frightened?

Go and explore!

Who or what do you meet?

Here are some words to help you.

Read the words to give you some ideas for your story.

You may ask for help with spellings of other words.

Planet surface landed alien being

Colours blue red green grey black white silver gold

Other words to help you.

glittery glowing sparkling dark light night bright cold
warm freezing icy hot breathing breathe breath
swirling mist clouds gas fog sunlight stars noises
hills rocky mountains quiet water liquid flowing volcano
