

ICT Evaluation (Graphics)

Name _____ Date _____

You have just successfully translated your drawing onto the computer, but now you need to think about how you achieved this.

Is your printed picture the same size as your drawing? If not, what could you have done to have made it the same size?

Describe how you drew your shapes on the computer. Was there any shape that was hard and why? Did you use a particular drawing tool?

How did you manage to change your shapes so that they faced the way you wanted them to?

How did you get your shapes the colour you wanted them?

How did you get your shapes in the right order on your picture (behind or in front of each other?)

How did you change the thickness of your lines?

ICT Evaluation (Graphics)

Name _____

Date _____

What was the easiest part of putting your drawing on the computer? Why do you think this was?

What was the hardest part? Why do you think this was?

Are you pleased with the printed drawing? Why?

What would you say to someone about to 'draw' their picture on the computer?

What have you learned from this topic?

Are you pleased/unhappy with your final picture? Why?

Ask your computer partner to write a comment in this box. Does he/she agree with your comments, is there anything they would like to say about your work or your attitude to the task? Did he/she find you helpful when he/she was drawing her/his picture?
