Double Check

We know that division is the opposite of multiplication so we can use this to help us double check our answers.

- $4 \times 2 = 8$ double check $8 \div 4 = 2$ so my multiplication was right.
- $4 \times 3 = 8$ double check $8 \div 4 = 2$ opps something went wrong with my multiplication, I multiplied by 2 instead of 3.

1. $8 \times 4 = \underline{\quad}$ now double check $\underline{\quad} \div 8 =$ (should be 4)

2. $5 \times 6 = \underline{\quad}$ now double check $\underline{\quad} \div 5 =$ (should be 6)

3. $7 \times 3 = \underline{\quad}$ now double check $\underline{\quad} \div 7 =$

4. $10 \times 9 = \underline{\quad}$ now double check $\underline{\quad} \div 10 =$

5. $8 \times 9 = \underline{\quad}$ now double check $\underline{\quad} \div \underline{\quad} =$

6. $6 \times 7 = \underline{\quad}$ now double check

7. $11 \times 4 = \underline{\quad}$ now double check

8. $22 \times 4 = \underline{\quad}$ double check

9. $24 \times 3 = \underline{\quad}$ double check

10. $36 \times 5 = \underline{\quad}$ double check
