

## Inverse problems B

We can write out sums in different ways in order to check them. For example:

$$625 - 87 = 538 \quad \text{could be checked by using the sum:}$$

$$538 + 87 = 625$$

and

$$160 \div 4 = 40 \quad \text{could be checked by using the sum:}$$

$$40 \times 4 = 160$$

Work out the following sums and then rewrite them to check if your answers are correct.

1)  $635 - 88$

11)  $457 - 34 + 380$

2)  $200 \div 8$

12)  $342 \div 9$

3)  $140 + 36$

13)  $25 \times 19$

4)  $36 \div 2$

14)  $520 \div 11$

5)  $35 \times 4$

15)  $48 \times 8$

6)  $297 + 406$

16)  $24 \times 15$

7)  $240 \div 8$

17)  $62 \times 6$

8)  $67 + 83 + 135$

18)  $(5 - 3) \times 12$

9)  $21 \times 5$

19)  $(4 \times 5) + 10$

10)  $330 \div 5$

20)  $3 \times (2 + 4)$
