

JUST ADD A ZERO

(10 times table)

Just add a zero, just add a zero, just add a zero if you want to times by ten (x2)

Behind a pair of smelly socks, I found my old money box
I turned the key in the lock **'WHAT IS INSIDE IT?'**
It was full of ten pound notes **'NO WAY!'** Counting tenners can take all day!
But I've found an easy way, so let me hear you say... **'YEAH!'**

1 10 is 10

2 10s are 20

3 10s are 30

4 10s are 40

5 10s are 50

6 10s are 60

7 10s are 70

8 10s are 80

9 10s are 90

10 10s one hundred

11 10s one ten and

12 10s are one twenty

With my cash I thought I'd try to find something nice to buy
A coat, a boat or even a goat? **'HOW WILL HE SPEND IT?'**
I shopped and shopped until I dropped, found 12 things I liked a lot
10 pounds each at my local shop, so how much did that cost?

CHORUS

CHORUS – FILL IN THE ANSWERS!

Just add a zero... (repeat and fade)
