

# Volcano Experiment

## Instructions:

- 1) Make a small ball out of play dough and make a hole through the middle using a pencil.
- 2) Put the dough onto the plastic dish. Make it look like a bit more like a volcano. Just make sure the hole is still wide enough.
- 3) Place one teaspoon of the powder in the bottom of the volcano.
- 4) Add the "eruption mixture" using the dropper until it starts fizzing.

Name:

# Volcano experiment

Our aim (why were we doing this experiment?):

Equipment we used:

What we did:

- 1).....
- 2).....
- 3).....
- 4).....

What happened and why:

.....  
.....  
.....
