

Line of Four (Addition)

This is a game for two players, using calculators. You will need one calculator each, and two sets of coloured counters (or circles of coloured paper).

- 1) Choose who will take the first turn.
- 2) This person should choose two of the numbers below:

2	3	8	10	14	20	51	67	99
---	---	---	----	----	----	----	----	----

- 3) Then, they should add these numbers together, and find the answer on the board below. Next, they should place one of their counters on top of this number on the board at the bottom of the page.
- 4) The other person should now take their turn (choosing two numbers, adding them, and placing their counter on the correct space on the board).
- 5) Take it in turns, repeating this process. The first player to cover four squares with his / her counters in a row in any direction is the winner.

101	119	77	102	75	70
24	5	11	18	12	71
107	69	87	13	61	113
23	28	30	10	22	53
118	16	17	59	65	166
54	34	109	150	22	81

Line of Four (Multiplication)

This is a game for two players, using calculators. You will need one calculator each, and two sets of coloured counters (or circles of coloured paper).

- 1) Choose who will take the first turn.
- 2) The person who goes first should choose two of the numbers below:

2	3	5	7	10	11	15	20	24
---	---	---	---	----	----	----	----	----

- 3) Then, they should multiply these numbers, and find the answer on the board below. Next, they should place one of their counters on top of this number on the board at the bottom of the page.
- 4) The other person should now take their turn (choosing two numbers, multiplying them, and placing their counter on the correct space on the board).
- 5) Take it in turns, repeating this process. The first player to cover four squares with his / her counters in a row in any direction is the winner.

360	30	140	77	35	48
60	110	6	20	200	10
100	75	480	50	300	40
70	22	165	33	30	120
72	15	21	55	220	105
168	150	45	240	14	264
