

Commas

Commas are used in lists of nouns (names of people, places and objects) to separate them, except for the last one which is usually separated with 'and'.

Example: On our holiday we visited Belgium, France, Luxembourg, Germany, Switzerland, Italy, Monaco and France.

Write these sentences in your exercise book, inserting commas in the correct places.

1. Humans have incisor canine and molar teeth.
2. Parts of the digestive system include the stomach large intestine, small intestine and gullet.
3. Major organs of the body include the brain liver heart lungs and kidneys.
4. Parts of a flower include the leaves stamen stigma petals and sepal.
5. Common birds include the sparrow blackbird blue-tit chaffinch and magpie.
6. Some types of metals are iron steel copper silver brass and aluminium.
7. Materials can be light heavy waterproof rough smooth flexible opaque or transparent.
8. Limestone granite slate and sandstone are some of the rocks found in Britain.
9. Water can evaporate boil freeze melt and condense.
10. Push pull magnetism gravity and friction are types of force.

Extra Activity

11. If you have time after completing the above exercise, write a sentence, using commas, which lists the equipment you would use to make an electric circuit.
12. Write a sentence about some of the planets that can be found in the solar system.
