

### Skull and Jaw

There are \_\_\_ bones altogether in the skull and jaw. They make a box to protect the \_\_\_\_\_, \_\_\_\_\_ and \_\_\_\_\_.

### Ribcage

This protects the \_\_\_\_\_ and \_\_\_\_\_. There are 24 curved bones, and the \_\_\_\_\_ runs down the middle.

\_\_\_\_\_ This is the bone in your upper arm. It is a long bone and goes between your shoulder and elbow joints.

### Radius and Ulna

These are the bones in your lower \_\_\_\_\_. The \_\_\_\_\_ is on the thumb side of your arm. The two bones swivel over each other when you twist your \_\_\_\_\_.

### Hand Bones

There are lots of bones in your hands. There are bones in your wrist (\_\_\_\_\_), palms (metacarpals) and \_\_\_\_\_ (phalanges).

### Spine

Your spine is made up of \_\_\_\_\_ individual small bones (called vertebrae). Your spine supports your \_\_\_\_\_ and body. Each of the vertebrae is linked by small joints which can only move a little. Lots of small movements add up and let your spine bend a lot.

### Clavicle

This is the collar bone, and joins the sternum to the \_\_\_\_\_.

\_\_\_\_\_ This is also known as the shoulder-blade.

### Pelvis

Your pelvis is shaped like a \_\_\_\_\_. It holds all of the \_\_\_\_\_ in the lower part of the body.

\_\_\_\_\_ The femur is the thigh bone. It is the \_\_\_\_\_ bone in the body and is one of the strongest. It helps to support your weight when you \_\_\_\_\_.

### Patella

This is the bone in your \_\_\_\_\_.

### \_\_\_\_\_ and Fibula

These bones are both in your \_\_\_\_\_. The tibia is the thicker shin bone, and the fibula is the slimmer bone. They both hold the lower leg \_\_\_\_\_ in place.

### Foot bones

There are 26 bones in your \_\_\_\_\_. They can make an \_\_\_\_\_ shape to support your body when you stand up.
